

Nisha Hanamashetty

+91 8095206916 | nishahanamashetty678@gmail.com | LinkedIn | Github | Bengaluru, India

Professional Summary

Java Full Stack Developer with hands-on internship experience in developing responsive web applications using Java, Spring Boot, JDBC, MySQL, HTML, CSS, and JavaScript. Skilled in CRUD operations, REST APIs, and database integration. Passionate about software development and eager to contribute to real-world projects.

Technical Skills

Programming Languages: Java, Python, SQL, Javascript.

Front-end Technologies: HTML, CSS, Bootstrap

Back-end Technologies: Core Java, Springboot, JDBC, Servlets, Hibernate

Databases & Storage: MySQL

Tools & Platforms: Github, VS Code, Eclipse IDE

Testing Skills: Manual Testing, Smoke Testing, Functional Testing, Bug Reporting

Operating System: Linux, Window

Cloud: AWS(Basics)

Professional Experience

Technical Recruiter

Curatal

Nov 2025 – Present

Bengaluru, India

- Evaluated engineering candidates' technical competencies in Core Java, Spring Boot, Databases, and Full Stack frameworks to match complex client requirements. Sourced candidates through job portals, LinkedIn, and internal databases
- Utilized advanced sourcing techniques on LinkedIn and technical platforms to systematically identify and screen niche software engineering talent. Coordinated interview schedules between candidates and hiring managers
- Conducted initial technical-vibe and HR screenings, mapping candidate project experiences against core backend and frontend job specifications.
- Collaborated closely with hiring managers to deep-dive into project architectures, job specs, and talent pipeline blockers.
- Maintained meticulous recruitment trackers and database records to analyze and optimize hiring pipeline workflows. Facilitated cross-functional stakeholders, driving candidate onboarding, compliance management, and technical documentation processes.

Software Engineer Intern

Destination Technologies

June 2024 – Nov 2024

Bengaluru, India

- Developed responsive web applications using Java, HTML, CSS, JavaScript, and Bootstrap
- Built backend applications using Core Java, JDBC, Servlets, and Hibernate
- Worked with MySQL database for CRUD operations and data management
- Developed REST APIs and implemented basic Spring Boot concepts
- Practiced version control using Git and GitHub
- Completed mini-projects involving full-stack web application development

Education

Bachelor of Technology in ECE

Visvesvaraya Technological University, Belagavi

2020 – 2024

Basavakalyan, India

CGPA: 8.5/10.0 • Relevant Coursework: Java Programming | Database Management Systems | Object-Oriented Program-ming | Compilers | Operating Systems | Computer Networks

Project

Job Portal Application | Java Full Stack Project

- Developed a Full Stack Job Portal application using Java, JDBC, Servlets, HTML, CSS, JavaScript, and MySQL
- Implemented role-based authentication for Admin and Job Seeker modules. Developed features such as job posting, job search, and application management
- Designed responsive user interfaces and integrated frontend with backend services
- Performed CRUD operations for managing users, jobs, and applications. Designed and managed MySQL database schemas for efficient data storage and retrieval
- Optimized JDBC-based database connectivity and query execution. Followed MVC architecture principles for better code structure and maintainability
